

Interest Calculation Method Adopted by NTB PLC on Credit Cards

Important Points:

1. In the event the Card member pays the full outstanding on or before the due date there will not be any interest charged on the card account for that cycle.
2. Interest is calculated daily on the reducing balance method.
3. Interest charged will be mentioned in the subsequent statement cycle.
4. Date indicated under the 'Post Date' on the statement will be considered as the starting date for interest calculation of each transaction
5. Transactions posted on the same statement cycle will not be taken in to consideration for interest calculation
6. When the outstanding includes balances remaining from cash advances, cash rate is applicable on that balance component in addition to the one-time charge of cash advance fee charged on the date of transaction.
7. In addition to Debit interest, late payment fee will be levied if the minimum due is settled after the due date or if the payment made is less than the minimum due or if no payment is received on or before the due date.
8. The following formula is used for interest calculation;

$$\text{Capital Amount} \times \text{Interest rate} \times \text{No. of Days} / 365$$
